

## **International Financial Accounting Standard (IFRS)**

In Canada, public companies must comply with the International Financial Reporting Standards (IFRS) and private companies may choose to make the required changes. This workshop series will provide a clear understanding of the requirements specified by the International Reporting Standards. An examination of the details and significant differences between the Canadian GAAP and IFRS standards as well as a review of the application of IFRS 1, which is the standard that applies only for the first year of implementation, will help companies prepare for the 2011 deadline. Note: the one half day workshop is a pre-requisite for the full day.
